DRAINAGE: EXCAVATION AND REPAIR

Pipe relining, this is the most convenient and cost effective way of repairing damaged pipes/drainage without the hassle of a complete dig up. We can line pipes from 100mm up to 900mm in size.

Pipe relining is a way of repairing a pipe by inserting and inflating an epoxy or polyester based resin lining. Once the liner is in place it prevents leaking joints, ingressing tree roots and even new connections can be attached. Connecting lateral joints are opened up with the use of specialised cutters. This technology is cost effective as it saves businesses from valuable downtime and extensive excavation. The newly relined pipe has over 50 years expectancy, it's as good as replacing with a new pipe. Our teams can identify problems and put in place the correct course of action required. If there's no other way, excavation is a must. Sometimes, the need for excavation is the only way forward to repair drainage problems. We will provide a full service from quote through to completion taking into account all environmental factors and incorporating SuDs – Sustainable Drainage Systems.

If you are looking at incorporating SuDs, we will visit your site free of charge to discuss. We have all the specialist knowledge required to investigate and provide the best solution for you and your building.

IRRIGATION

We offer a fully-managed garden irrigation service. From consultation to survey, system design to installation and finally ongoing maintenance and support. We draw up all plans in-house and offer what we believe is best suited to your needs. We can also offer a maintenance package which includes both a winter shutdown and a system restart in spring as well as checking for any minor repairs that may be required, looking after our customers to ensure complete satisfaction.

GARDEN MAINTENANCE

We can create a yearly, monthly or weekly plan with you to keep your garden looking in the best possible shape all year round. We are also able to offer the best advice for lawn care, bed maintenance, tree care. Whether it's just from mowing and trimming or planting your flower displays for all year round maintenance and upkeep we create a custom plan to your needs and ensure we completed on time throughout the months of the year. We cover every basis and angle to create or maintain a pristine look and upkeep. So whether it's your garden or a business premises or public area we provide the best service and assistance all year round.

TREE CARE

We have a team of tree surgeons, all tree work considered and hedge cutting. Maintaining the welfare of your garden plants, especially the heavy, large trees, sometimes require a professional touch.

Trees can branch out further than your boundaries, requiring a chop or in extreme weathers, may fall, causing an inconvenience and a safety issue to many parties. Or, for the more cosmetic types, the shape of your tree may be an unsightly thing, resulting in the need for a shaping. We also can provide a 'crown reducing' solution to the shaping of your trees. This service maintains the natural shape of the tree, whilst reducing the height and width to a more manageable size. Working closely to the local Tree officers.

TREE WORKS INCLUDE:

- Removal / Maintenance of fallen trees
- Tree cutting
- Crown reducing
- Shaping
- Reducing
- Emergency tree cutting
- Dead wooding

SAFE CONTRACTOR

We are fully Safe Contracting certified. If there are any works you would require us to have a look at please do not hesitate to call our friendly team.
